Charging

1. Connect the player to your computer using the included USB cable.
2. Charge the battery between 3-5 hours. Do not charge for more than 8 hours.
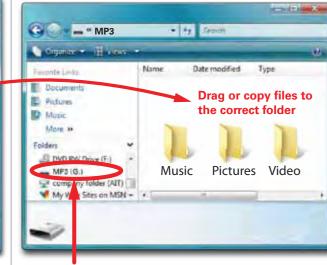

Mini SD card

The player supports Mini SD cards (not included), which allow you to add up to 8GB additional memory to the MP3 Player.

To insert the Mini SD card:
1. Insert the Mini SD card into the card slot with the metal contacts facing down towards the back of the player and gently push it in until it clicks. Do not apply excessive force, as this may damage the player and Mini SD card.

2. To remove the Mini SD card, gently push it in until it pops out.

Mini SD card
(Insert contacts facing down)

ℹ You may access the files on the card from the browser in the music screen.

Transferring media files to the player

1. Find music, picture, or video files on your computer.

*Screenshots above may be slightly different than your computer's operating system.

2. Connect the MP3 Player to your computer, and locate "MP3".

3. Drag the files into the Music, Pictures or Video folder.

Drag or copy files to the correct folder

Music   Pictures   Video

Locate "MP3"

ℹ It is also possible to delete files on the player while connected to the computer. Select the file and press the delete key of the computer's keyboard.

Converting videos

Before transferring video files to the player, you must convert them to the correct format. Use the Video Converter provided on the included CD to convert most video files to the correct format suitable for the player.

1. Insert the CD into your computer's CD drive.

2. The CD should open automatically. On the installer screen that appears, select "Video Converter".

Installer screen

ℹ If the CD does not open automatically, go to "My Computer" to manually launch the installer screen.

Basic operation

Turning on/off:
Make sure the player is fully charged before turning it on.
- To turn the player on/off, slide and hold the **[POWER]** switch to the right until the display turns on or off.

Lock 🔒   ⏻ Power

Lock/unlock function:
The Lock function prevents you from accidentally pressing the buttons while using the player.
- To lock the player, slide the **[POWER]** switch to the left. To unlock, slide the **[POWER]** switch to the right.

Resetting the player:
If the player malfunctions or freezes, you can use the reset function to restart it.
- To reset the player, take a metal pin (such as the end of a paperclip), and gently push it into the RESET hole to restart the player.

Using the player

After turning on the player, the main menu appears.
- Touch an icon on the main menu to select it.
- To return to the main menu, press the 🏠 Home button or press and hold the **[M]** button.

Main Menu Options:
- music: play songs
- video: play movies
- photos: view pictures
- record: record voice memos
- browser: view or delete files on the player
- settings: change system settings

Listening to music
Select "music" from the main menu and the music screen appears. Music playback can be controlled from the touch display or the **[+] [−] [M]** buttons of the player.
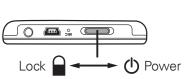

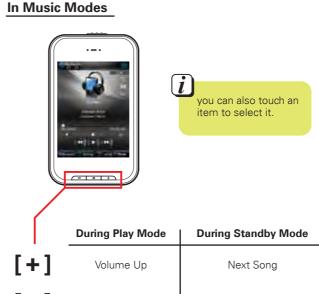

Main Directory   Mini SD card directory (if card is inserted)

Troubleshooting

Can not power on
- The battery may be exhausted, please recharge the battery.

Files can not be transferred to the player
- Check if the driver is installed correctly in the computer by disconnecting and then reconnecting the player to the computer
- Check the connection between the player and PC, and confirm the USB cable is properly connected.

No sound from the headphones
- Please ensure the volume is turned up, and the headphones are properly connected.
- Check if the format of music file is supported by the player.

Can not record
- Check if there is enough memory and battery capacity.

Display is in the wrong language
- Please ensure you selected the correct language from the "Settings" menu.

The buttons do not work
- Slide the **[POWER]** switch to the right to unlock the player.

I cannot display my .jpg files
- Many digital cameras and image editing softwares add hidden data to the .jpg files. This data can prevent the player from loading the images. Try to eliminate them by saving the file with another name.

Resetting the player
If the player malfunctions, you can use the reset function to restart it.
- To reset the player, take a metal pin (such as the end of a paperclip), and push it into the RESET hole to restart the player.
